DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-36 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Jones et al. (United States Patent No. 6,409,504)

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Jones et al. disclose a computer implemented method for separating gingiva from a tooth on a computer model of the gingiva and the tooth. The method includes the steps of defining a closed cutting surface passing thru a line between the gingival and a crown of the tooth, wherein the closed cutting surface comprises a crown portion surrounding the crown of the tooth and a root portion approximating the shape of the root of the tooth and applying the cutting surface to separate the gingival from the tooth (see col. 14, lines 45-58; col. 15, lines 12-26; col. 16, lines 1-5; claim 25).

Art Unit: 3732

Response to Arguments

Applicant's arguments filed 03 July 2006 have been fully considered but they are not persuasive.

In response to applicant's arguments that Jones et al. does not disclose a closed cutting surface comprising a crown portion surrounding the crown of the tooth and a root portion approximating the shape of the root of the tooth, Applicant's attention is directed to col. 14, lines 45-58; col. 15, lines 12-26; col. 16, lines 1-5; claim 25; and figures 35A-35F.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
